What is Technocracy?

People who subscribe to Technocracy ideals believe Democracy and Freedom are incompatible. They believe that the resources, energy, policies of all other decision makers should not be voted on by elected representatives but decided by the most intelligent of society who will be the leaders. Everyone else will be the workers, with "payment" being directly connected to each individual's energy.

Pillar 6
 Shut down "Elite" (i.e. "Leftist" Progressives) Media + Universities

- Control the Message
- Control the Education

= ◦ Control the People's Minds

Technocrats are all about Social Engineering "majority" don't get any bright ideas to rise up against the elite minority.

Pillar 5
 Campaign on Autocracy
 Government IS the Problem + Private Industry will be what makes us Great Again.

The original Technocracy idea was very Socialistic, + inspired by the desperate times of the Great Depression. It has since then become more Capitalistic, a fusion of wealthy elites desire for control to create their version of a "Better World Order".

It should be noted that Elon Musk's grandfather Joshua Haldeman was a technocrat, + likely passed these ideas down to his family.

Pillar 4
 Pick Loyalty for Congressional AND Presidential Roles.
 With over \$1 Billion Spent on Trump's Pres. Campaign last year, the magnitude of the **MONEY** has become louder + more blatant than ever.

Money Rules Politics
 And Buys Loyalty
